

**OVERDRIVE  
TS808 AND BOOST**

**Demonfx Overdrive Df8 Based on Ibanez TS808DX  
Tube Screamer Pro Deluxe Overdrive Pedal**

For over 30 years the Ibanez TS808 Tube Screamer has been one of the most popular overdrive pedals in the world. The unmistakable little green stomp box has been a perennial favorite, cherished by rock's most celebrated guitarists for its warm, creamy tone and unequivocal responsiveness. Now Ibanez has expanded the palette of "The Screamer" with the new TS808DX.

**Panel Instruction**

A true TS808 Overdrive, featuring the JRC4558D IC for that signature soft, subtle clipping sound, and a boost circuit, capable of adding up to 20db at the tap of a switch. The pedal incorporates two individual, true bypass switches for total independent control, allowing the Overdrive and the Booster to be used separately or in conjunction with each other. Add the Boost for a few extra db while playing through the Overdrive circuit, or just engage the booster on its own for that little extra lift while playing clean.

**20db Boost**

**A toggle switch allows for the choice of placing the boost circuit before or after the overdrive section**

**Designed By USA**

- Overdrive and Booster in one box
- Overdrive : Overdrive, Tone and Level controls
- Booster : Boost, Switch for Pre Overdrive / Post Overdrive
- True Bypass
- Required Current: 43mA@9V
