

Based on Mad Professor Sweet Honey Overdrive.

### DYNAMIC LOW GAIN OVERDRIVE PEDAL

It is designed to overdrive distorted amplifiers and give dynamically controlled light overdrive on clean sounds.

Distortion level can be controlled by pick attack and pickup strength.

Harder picking for overdrive and softer for a cleaner tone. With the unique Focus control, you can adjust the feel and dynamics of the pedal as well as overall EQ

Turning Focus CCW you need to play harder to get distortion and the tone is softer, great for jazz and blues.

Focus turned CW gives a slight treble boost and earlier distortion great for classic rock.

### PANEL FUNCTION

**VOLUME** sets the output volume.  
**DRIVE** controls the amount of overdrive.  
**FOCUS** controls how easily the circuit distorts as well as adjusting overall EQ. Turning CCW gives less distortion and a mellow effect, turning CW gives a slight treble boost and earlier distortion.  
 Good starting point is 11 o'clock.

### SPECIFICATION

Input impedance: 260K

Output impedance: 25K Ohm's

True Bypass

POWER CONNECTOR: 9Vdc, center negative, 2.1mm x 5.5mm

Dimension(L\*W\*H): 11.5\*6.5\*5CM

Weight: 300g

Designed By U.S.A
